FOOD AND NUTRITION INDICATORS

KEY DOCUMENTATION ON INDICATORS FOR DEVELOPMENT AND EMERGENCIES – A PRELIMINARY REFERENCE LIST

Note 1:

This table is compiled from selected contributions from members of working groups and task forces of the UN Standing Committee on Nutrition (SCN). Since it is not a thorough review, you should complement from your own sources.

A **full list** of the references contributed follows on page 17

Note 2: Organisation of column 1 (“References”)

The references are organised alphabetically in three sections:

1. Manuals, guidelines & training material	page	4
2. Strategic programme reports		10
3. Indicator and data research and programmes		13

Cross-check your indicator interests via the indicator category columns.

Note 3: Key to the 17 indicator categories

These columns show just the main indicators in focus in each document

1. Poverty
2. Water and physical environment
3. Political & social environment
4. Transport, infrastructure, utilities, services
5. Urban livelihoods
6. Rural livelihoods
7. Women: roles, care, educational level
8. Food availability & markets
9. Food access
10. Food consumption
11. Coping strategies, incl. family cohesion and care under stress
12. Infant and child feeding, care
13. Health status, incl. demography & mortality
14. Health care: institutional and household
15. Anthropometric measures of nutritional status
16. Micronutrients: status, provision
17. Institutional readiness and capacity around dealing with nutrition issues

Note 4: Contents of column 19 (“Comments & further information”)

Included may be:

- type of document (eg manual, strategy, research, project report, assessment...)
- context(s) in which (or for which) document was written
- level of aggregation of indicators addressed (eg individual, community, national ...)
- noteworthy aspect(s)
