

## The COVID-19 pandemic is disrupting people’s food environments: a resource list on Food Systems and Nutrition responses.

Last updated by the UNSCN Secretariat in December 2020, [available online here](#)

The current global outbreak of Coronavirus (COVID-19) has disrupted food systems around the world. Food environments are where people meet the food system. Around the world people’s food environments are rapidly changing in both their external dimensions – food availability, prices, vendors- as well as personal dimensions – geographical access, affordability, convenience and desirability. These rapid food environment changes are influencing the consumers’ dietary practices and can lead to a deterioration in both individual, and country level, nutritional and health status.

People, and their health and nutrition status, are what counts. Sustainable healthy diets that contain sufficient fruits and vegetables are crucial in protecting people’s immunity. Particularly for those at risk of, or suffering from food insecurity and those with pre-existing non-communicable diseases who are at a heightened risk of becoming severely ill with the virus.

The work of UN agencies and partner organizations to promote nutrition and healthy food systems during the pandemic is continually expanding and strengthening. Contributing to the coronavirus pandemic response, the UNSCN has compiled a list of available resources and key readings with a focus on nutrition and food systems. This list will be continually updated **and expanded as more resources become available.**

Topic	Agency	Name	Description	Publication Date
<b>UN AGENCIES GENERAL RESPONSE</b>				
UN agencies all play a role in the global response to COVID-19. These links will direct you to agency’s key COVID-19 related health and nutrition information.	UN	<a href="#">Coronavirus disease (COVID-19)</a>	Latest updates on the United Nations response to COVID-19 including the policy brief on <a href="#">The Impact of COVID-19 on Food Security and Nutrition</a> (June 2020). See the full list of <a href="#">UNSG Policy briefs here</a> UNSG Report <a href="#">Shared responsibility, global solidarity: responding to the socio-economic impacts of COVID-19</a>	Continually Updated  March 2020
