**WEDNESDAY 17 OCTOBER 2018**

Red Room • FAO Headquarters, Rome

**06:00-07:30 pm**

Refreshments will be provided after the event at the 'Arbre de la vie'

**TRANSLATION AVAILABLE (ENGLISH- FRENCH – SPANISH)**

The event will be webcast on <http://www.fao.org/webcast/home/en/item/4860/icode/>

The event will explore new food-based solutions to improve food security and nutrition, highlighting the necessity to increase global investments to reduce malnutrition and improve diets. While agricultural crops have dominated the discussion to date, fish is showing promise as a new effective solution. Micronutrient-rich small fish species in particular, may be an important (and currently missing) piece of a complex nutrient-food security-human capital puzzle, especially for poor women and young children.
