

United Nations System Standing Committee on Nutrition

UNSCN NUTRITION

GUIDELINES FOR CONTRIBUTORS

The editor of UNSCN Nutrition welcomes contributions for future issues. Submission of an article does not guarantee publication. Overall editorial control is retained by the UNSCN Secretariat. All potential acceptable manuscripts are peer-reviewed. The UNSCN Secretariat routinely edits manuscripts and, where necessary, condenses the text and omits tabular and illustrative material.

Please direct any queries to the UNSCN Nutrition Editor at: UNSCN Secretariat, c/o Food and Agriculture Organization of the United Nations, Viale delle Terme di Caracalla, 00153 Rome, Italy.

Submission: Please send all manuscripts electronically to SCN@fao.org.

Biographical information: Please include biographical information, including affiliation of all authors and email of corresponding author.

Language and format: Manuscripts should be in English. In view of the fact that UNSCN publications are read and used by a variety of academic and professional individuals involved in nutrition, the style of the manuscript should be written in plain English (avoid colloquial expressions as well as professional jargon). Please refer to the preferred spellings guidance.

Length: When possible contributions should not exceed the following word count:

- Feature articles: 3,000 words
- Speakers' Corner: 1,500 words
- Publications: 200 words

Brief extract and key words: With any feature article, please include a brief extract of 3-5 key point sentences stating the purpose of the paper, main findings, and principal conclusions. Please emphasize new and important aspects of the paper and five key words for indexing.

Permission: Authors are responsible for obtaining permission from the copyright holder(s) to reproduce any material with copyright protection.

Tables and Figures: Tables and figures should be submitted electronically in separate files (either in Excel, Word or high resolution image files such as JPEG and PGN).

Links to the web: The UNSCN Nutrition format offers online readers the opportunity to link directly from publication online. Therefore please include relevant links in the body text, either as hyperlinks or in brackets following the phrase to be linked. This is particularly relevant when specific organizations, institutions, programmes or projects are mentioned. Please remember that hyperlinks do not replace references.

Referencing: Please see the Reference Style guide overleaf.

REFERENCE STYLE

General guidance

- References should be listed single-spaced at the end of the manuscript.
- Where a quotation is used in the text, the page number of the reference should be provided.
- Please provide complete information for each reference, including full journal titles and complete list of authors: use of et al. should be avoided.
- Please limit your list of references to not more than 35 sources; also, please take care to reference important research findings, statistics and survey results.
- In the body text references should be listed using the author and year of publication (ie Barker 1994), without commas.

In the bibliography, please use the following style:

Journal Article: Green L, Lucas AL, Livingston M (1995) Relationship between early diet and subsequent cognitive performance during adolescence. *Biochemistry and Social Transaction* 23(4S): 376-9.

Book: Barker DJP (1994) *Mothers, Babies, and Disease in Later Life*. BMJ Publishing Group: London.

Chapter in Edited Book: Martorell R (1991) Maternal height as an indicator of risk. In Krasovec K and Anderson M (eds.) *Maternal Nutrition and Pregnancy Outcomes*. Pan American Health Organization: Washington DC.

Conference Proceedings: UNICEF/UNU/WHO/MI (1999) *Preventing Iron Deficiency in Women and Children: Technical Consensus on Key Issues*. Technical Workshop, October 7-9, 1998. International Nutrition Foundation and Micronutrient Initiative: Boston and Ottawa.

United Nations Document: WHO/UNICEF/ICCIDD (1999) *Progress Towards the Elimination of Iodine Deficiency Disorders (IDD)*. WHO/NHD/99.4 World Health Organization: Geneva.

Government Report: Nigeria (1990) The Tobacco Smoking (Control) Decree, Decree No.20. 25 June 1990. *International Digest of Health Legislation*, 1990, 41(4):640-1.

General Report: ACC/SCN (1997) *Third Report on the World Nutrition Situation*. ACC/SCN:Geneva.

Unpublished Report: World Health Organization (1988) *Guidelines for leishmaniasis control at regional and subregional level*. (unpublished document WHO-LEISH/88.25; available from Division of Control of Tropical Diseases, World Health Organization, 1211 Geneva 27, Switzerland).

Personal Communications: Beaton G (1999) Personal communication.

UNSCN NUTRITION

PREFERRED SPELLING

This is a general guide to spelling used by UNSCN. British rather than American spelling is normally used. The general rule is to follow the spelling listed in the latest edition of The Concise Oxford dictionary. There are, however, a number of exceptions, some of which are listed below.

When there is a choice between using the suffix –ize or –ise, ize is preferred. Foreign words are italicized. Hyphens are generally used for compound adjectives or only when an adverb might be mistaken for an adjective (little-used car vs. little used car); some compound words remain hyphenated irrespective of their grammatical use: Vice-President, Director-General, side-effect.

ageing	field test (n.), field-test (v.)	practice (n.), practise (v.)
agenda, plural agendas	fieldwork	prenatal
anaemia	fetal, fetus	preschool
analyse	food-based and food-chain	program (computers only) programme (all non-computer uses) realization
antenatal	formula (pl. formulae (scientific), formulas)	
antiretrovirals	forty-two	recognize
behaviour	fulfil, fulfilled, fulfilment	re-examine
birth weight (but low-birth-weight infants)	globalization	seronegative, seropositive socioeconomic
bottle-feeding	government (general)	South-East Asia Region south-west
breastfed	Government of (particular country)	south-western
breastfeeding	haemoglobin	States Parties
breast milk (but breast-milk substitute)	health for all	sub-Saharan
caregivers, carer (not caretaker) century	HIV-infected	symposium (pl. symposia or symposiums)
colour, coloration	ill health	Triple A
cooperate	labelling	targeting
coordinate	labour	underfives
cost-benefit	labour intensive	under way
cost sharing	large-scale (adj.)	undernutrition underweight
counsellor	long-term (adj.)	well-being
cow milk/goat milk	low-cost	well documented
cross-section	macroeconomics	well funded
database	matrices	well known
day care (but day-care centre) deadline	Member countries	widespread
decision-maker	Member States	worldwide
decision-making	microeconomics	
defence	nutrition-related	/L
diarrhoea	organization	/mg
eastern Europe (geo)	overemphasize	21st, 22nd 60s 70s 80s
Eastern Europe (political) emphasize	overestimate	% not percent kcals
e-mail	overnutrition	
enrolment	overweight	
etiology	P values	
favour	per cent (but % is usual) percentage	
	policy-maker
