

Save the Children is the UK's leading international children's charity, working in more than 70 countries worldwide. As well as providing emergency relief, we focus on long-term development and prevention work. Our aim is to help children, their families and communities to be self sufficient.

Drawing on this practical experience, Save the Children also seeks to influence policy and practice to achieve lasting benefits for children within their communities. In all our work, we endeavour to make children's rights a reality.

Save the Children Development Manual No. 6

About the authors

The authors worked for Save the Children during the development of the household economy approach. Currently, John Seaman is Development Director of the Food Security Unit, Save the Children. Paul Clarke works for the World Food Programme in Rome. Tanya Boudreau and Julius Holt are with the Food Economy Group.

Acknowledgements

The authors wish to express their thanks to Leslie Adams, Christina Archer, Cassandra Chapman, Haile Kiros, Ellen Mathys, Gary Sawdon, Buzz Sharpe, Anna Taylor, Richard Mawer and Sonya LeJeune of Save the Children for their comments and support with the production of this manual. Particular thanks are due to Annalies Borrel, Jason Matus (World Food Programme) and Lola Gostelow (Save the Children) for acting as referees. The authors would also like to thank Mark Lawrence and Alex King (Food Economy Group), and the headquarters and overseas staff of the many Save the Children programmes whose work has made the development of the methodology possible. Thanks are also due to the European Union for supporting the early development of this work.

Save the Children would like to thank The Stationery Office for permission to reproduce extracts from *Tables of Representative Values of Foods Commonly Used in Tropical Countries* (see Platt, Annexe 4).

Contents
